

Innovation & Quality Continue at Huth Equipment!

Introducing Model 3012

The Huth/Ben Pearson Model 3012 Bender allows you to bend completely around the bending dies on the same centerline — creating smooth clean bends.

- The Model 3012 has more clearance than a typical press bender, allowing you to create more designs.
- Ben Pearson-compatible round and square tooling is readily available
- Bend round tubing from 3/4 to 3 inches in diameter
- Custom tooling for bending and end finishing can be made: Contact us to discuss
- Expanding up through 3-, 3 1/2- and 4-inch
