

New!

Swaging Positioning System attachment makes running repeated parts quicker !

- Supports tubing for swaging with defined end point.
- Makes repeated parts quicker and easier to produce.
- Reduces collet marks!
- Buy with bender or model 1673 expander-reducer, or to use with your existing Huth bender or swager.

How it works:

- Simply attach it to the back end of the swage box on your Huth bender or 1673 expander-reducer machine.
- Set the stop location with the positioning pins, and use the adjustable screw thread to fine tune.
