

# ROD BRACKET BENDER

From Huth's proven performance line of quality tooling, comes the Rod Bracket Bender. An industrial strength tool used to fabricate complex custom brackets and hangers not normally available. With this accessory, you can quickly and easily produce brackets from material as large as 1/2" dia round or 1/4" x 1" flat, low carbon mild steel.

1. Remove expanding arbor and the Rod Bracket Bender installs quickly and easily.
2. Place material to be bent in the Bender. Convenient scribe lines in block indicated 45° and 90° bends.
3. Activate the cylinder and bend complex custom brackets.

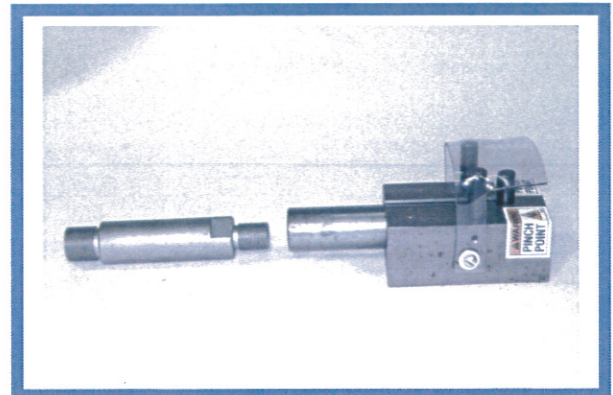

Model 985 Rod Bracket Bender fits all models of Huth Benders and Expander Models 1690, 1691, 1673 and 1674. By moving the adjustable collar you can select the depth of bend.

Ben Pearson Model 75985 Rod Bracket Bender fits models MB97, BP79, BP08, BP11. By moving the adjustable collar you can select the depth of bend.

For Ben Pearson Model MC59, use Huth Model 985 Rod Bracket Bender along with part number H524 Arbor Extension.
